

```
def someProcedure( . . . , cb ):  
    # before 'other'  
    otherProcedure( . . . ,  
        lambda result:  
            # after 'other'  
            cb( exp )  
    )  
# some part of otherProcedure may have  
# run, but the 'after' code has not
```
