

```
def someProcedure( . . . , callback ):  
    # before 'other'  
    otherProcedure( . . . ,  
        lambda( result ):  
            # continuation of 'other'  
            callback( exp )  
        )  
    # some part of otherProcedure may have  
    # run, but the continuation code has not
```
