

```
let ex1 = A( function* ex1( p1, p2 ) {  
    ... body ...  
    return whatever;  
} );
```

```
let ex2 = A( function* ex2() {  
    ...  
    A.atomic( function*() {  
        x = yield ex1( 42, "abc" );  
        y = yield fetch( "localhost/foo" );  
    } );  
    ...  
} );
```

```
let actHandle = A.spawn( ex2 );
```

```
async* function ex1( p1, p2 ) {  
    ... body ...  
    return whatever;  
}
```

```
async* function ex2() {  
    ...  
    atomic {  
        x = await ex1( 42, "abc" );  
        y = await fetch( "localhost/foo" );  
    }  
    ...  
}
```

```
let actHandle = spawn( ex2 );
```
